A BETTER STARTUP STARTS WITH FRICTION

Good ideas don't need praise.

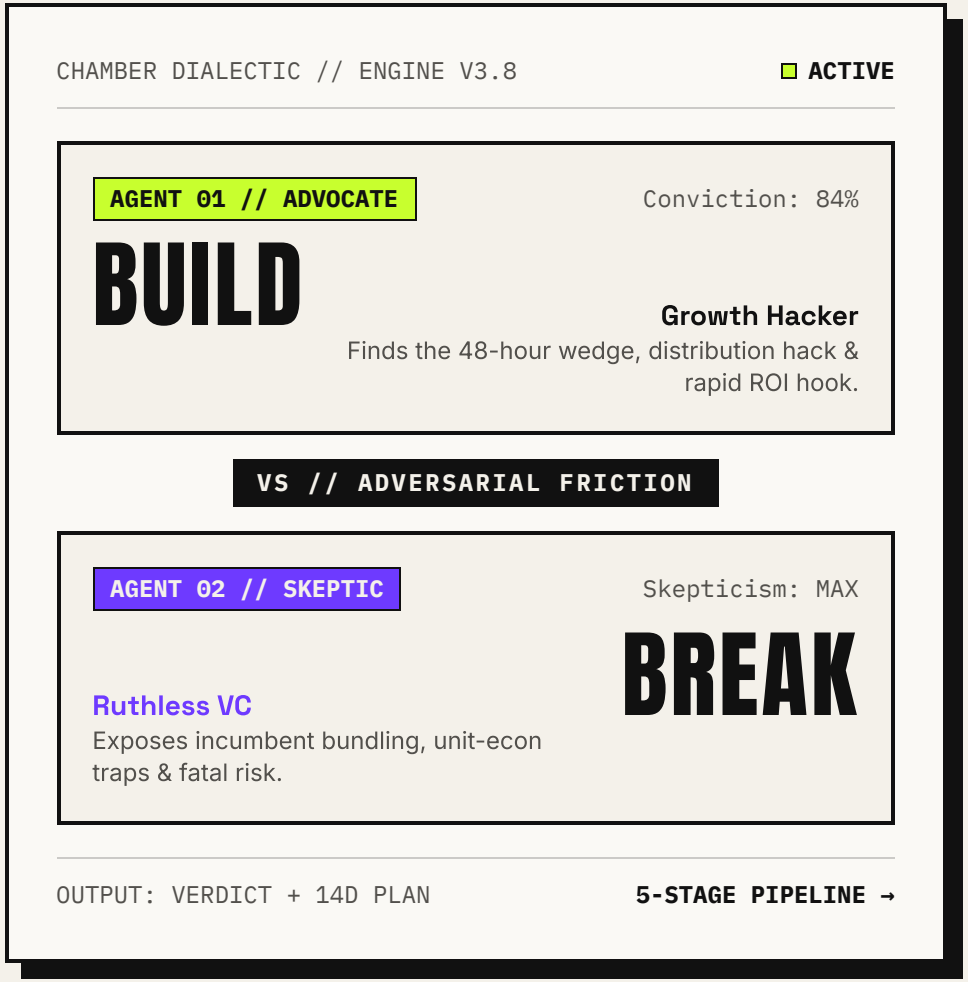

They need pressure.

SYNA puts any startup thesis between an opportunistic **Growth Hacker** and a **Ruthless VC** across 4 adversarial rounds—delivering an un-inflated survival score, a 14-day execution blueprint, and a live landing-page prototype in 60 seconds.

04 ROUNDS
WEDGE, MOAT, CAC & RISK

60 SECONDS
NAPKIN TO MVP PLAN

100% LIVE
ZERO API KEYS NEEDED

Standard AI chatbots are trained to be polite.

Markets and VCs are trained to be ruthless.

42% OF STARTUPS
DIE FROM BUILDING A FEATURE, NOT A COMPANY

✗ THE "POLITE AI" ECHO CHAMBER

DEFAULT CHATBOTS

When a founder pitches a weak idea to a generic LLM, RLHF politeness produces sycophantic validation instead of structural pushback:

1. SYCOPHANTIC PRAISE ("GREAT IDEA!")
Validates fatally flawed unit economics and ignores 12-month enterprise security stalls.

2. BLIND TO INCUMBENT BUNDLING
Fails to name the exact incumbent (Brex, Ramp, Coupa, Epic) shipping the same feature for free next quarter.

3. GENERIC BOILERPLATE ADVICE
Outputs vague textbook SWOT lists instead of a 48-hour wedge or falsifiable 14-day experiment.

RESULT: 6 MONTHS WASTED BUILDING A COMMODITY WRAPPER.

✓ THE SYNA ADVERSARIAL CHAMBER

STRUCTURED FRICTION

SYNA replaces polite agreement with a structured 4-round adversarial clash between two opposing incentives:

1. SPECIFIC INCUMBENT & MARGIN KILL-SHOTS
Names the exact system of record, procurement stall, and liability trap that could kill the company.

2. NARROW 48-HOUR DISTRIBUTION WEDGE
Forces the Growth Hacker to find a zero-permission audit or bottom-up hook that proves ROI in 48 hours.

3. BUILDABLE 14-DAY OUTPUT + LIVE PROTOTYPE
Synthesizes the clash into a scored audit, 30/60/90-day gates, and a conversion-ready landing page.

RESULT: BATTLE-TESTED THESIS BEFORE WRITING A SINGLE LINE OF CODE.

Two specialized agents clash across 4 rounds. You can intervene live.

Every claim is anchored to the founder's specific buyer, pricing model, and technical wedge—never recycled generic SaaS advice.

ROUND 01 — WEDGE

Market Wedge & Willingness to Pay

Can the founder prove dollar ROI in 48 hours without an IT overhaul, or will buyers treat this as a vitamin?

ROUND 02 — MOAT

Defensibility & Feature vs. Company

Why can't the incumbent ERP/card rail bundle a 70%-as-good clone for free next quarter? Where is the data moat?

ROUND 03 — UNIT ECON

Unit Economics & Go-To-Market

Does bottom-up distribution work, or do SOC-2 reviews and bespoke onboarding turn SaaS margins into consulting?

ROUND 04 — SURVIVAL

Existential Risk & The Saving Bet

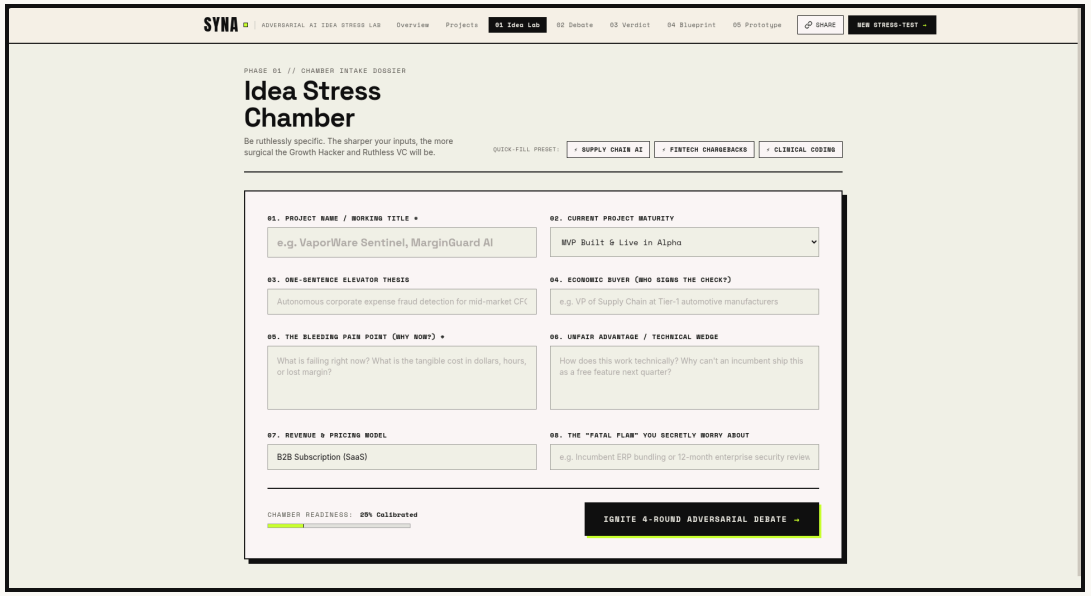

What single false-positive or regulatory liability kills the company, and what architectural bet neutralizes it?

INTERACTIVE LOOP

Live Founder Intervention Console

Founders aren't passive spectators. At any point during the debate, the user can inject counter-evidence (e.g., *"We already signed 6 pilot customers on read-only logs"* or *"Pricing is 15% of verified savings"*). Both AI agents immediately respond in a new round and **recalculate the Survival Score** (+ or – delta).

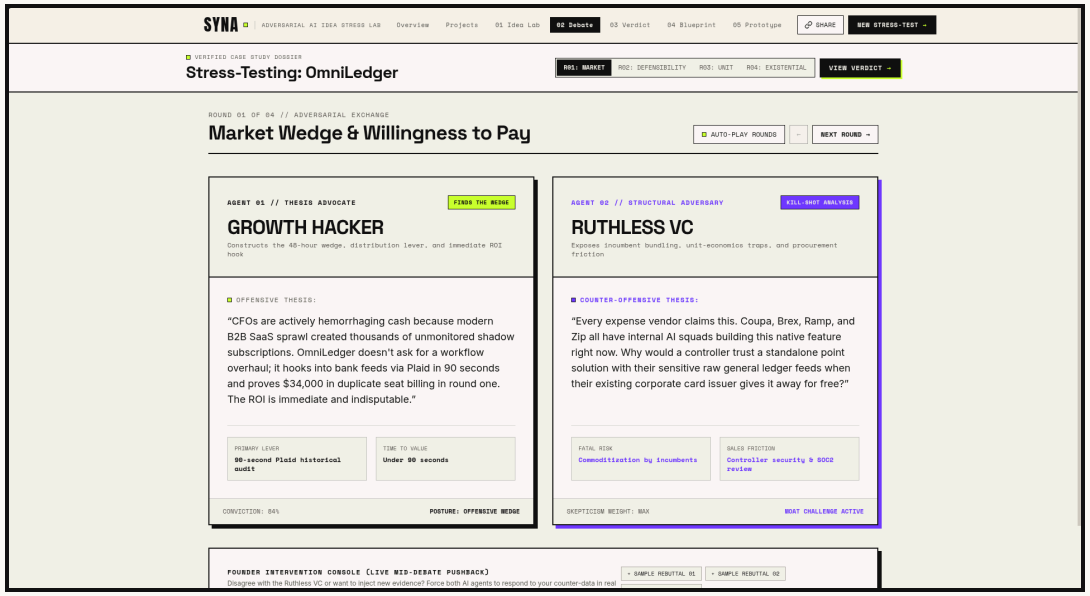

01 // IDEA STRESS CHAMBER — 8-Point Dossier Intake

Surgical Thesis Calibration + 1-Click Presets

Captures working title, maturity stage, elevator thesis, economic buyer, bleeding pain point, technical wedge, revenue model, and the founder's secret fear—plus 1-click presets (*Supply Chain AI*, *Fintech Chargebacks*, *Clinical Coding*) for instant testing.

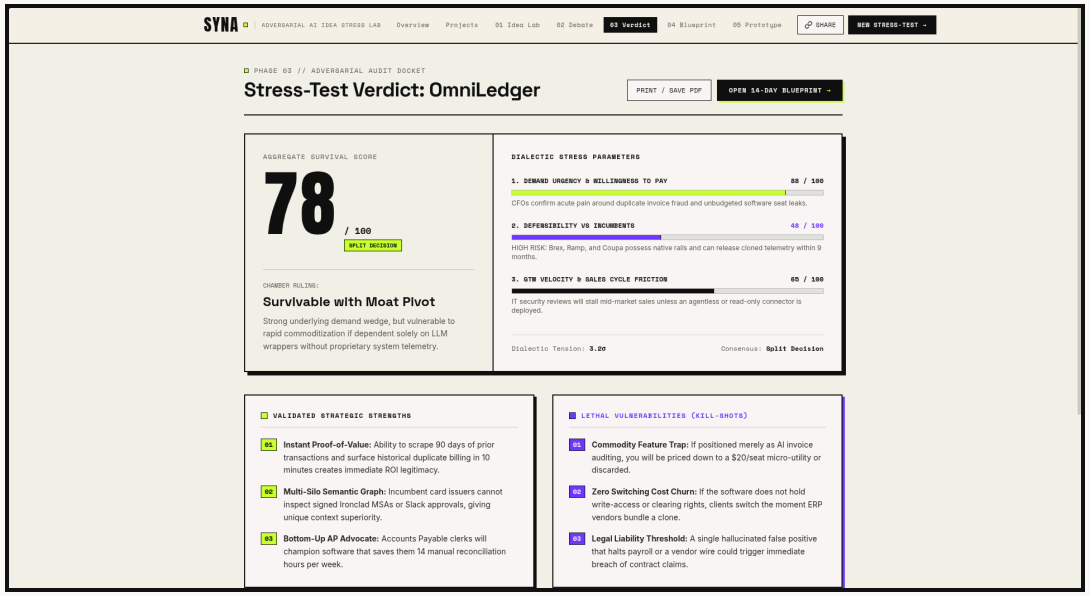

02 // LIVE DEBATE ROOM — Growth Hacker vs. Ruthless VC

Head-to-Head Dialectic + Rebuttal Injection

Side-by-side adversarial cards highlight the Growth Hacker's *Primary Lever* & *Time to Value* against the Ruthless VC's *Fatal Risk* & *Sales Friction*, with round-by-round navigation, auto-play mode, and live mid-debate founder intervention.

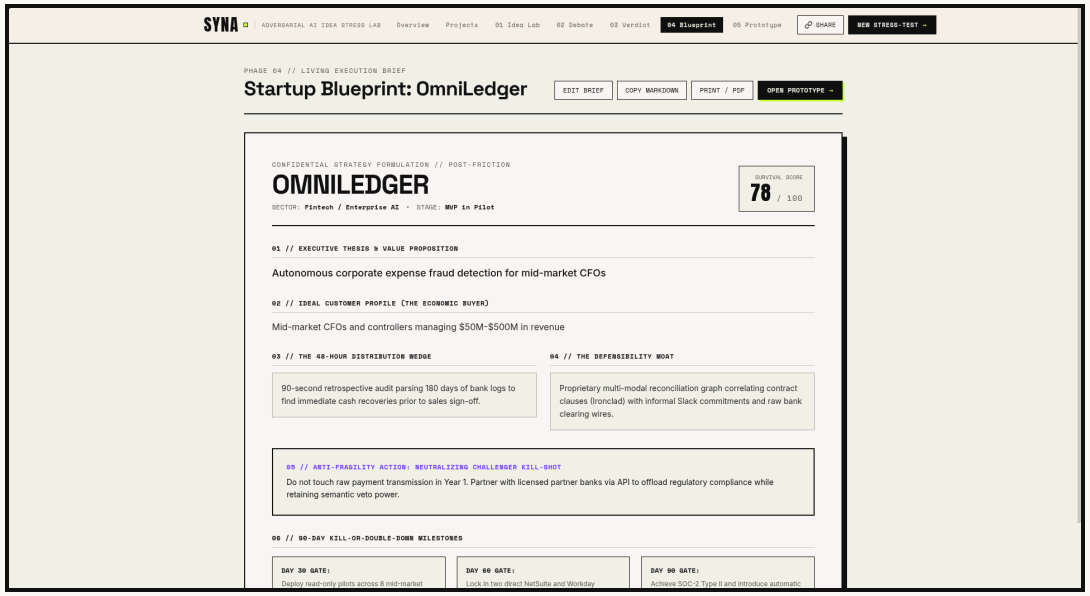

03 // ADVERSARIAL AUDIT VERDICT Survival Score + Strategic Fork

Un-Inflated Scoring & Kill-Shot Docket

Scores *Demand Urgency*, *Defensibility vs. Incumbents*, and *GTM Velocity* out of 100. Lists 3 validated strengths, 3 lethal vulnerabilities, and presents a concrete **Path A (Fast Wedge) vs. Path B (Moat Lock-In)** decision fork.

04 // LIVING STARTUP BLUEPRINT Editable + Markdown/PDF Export

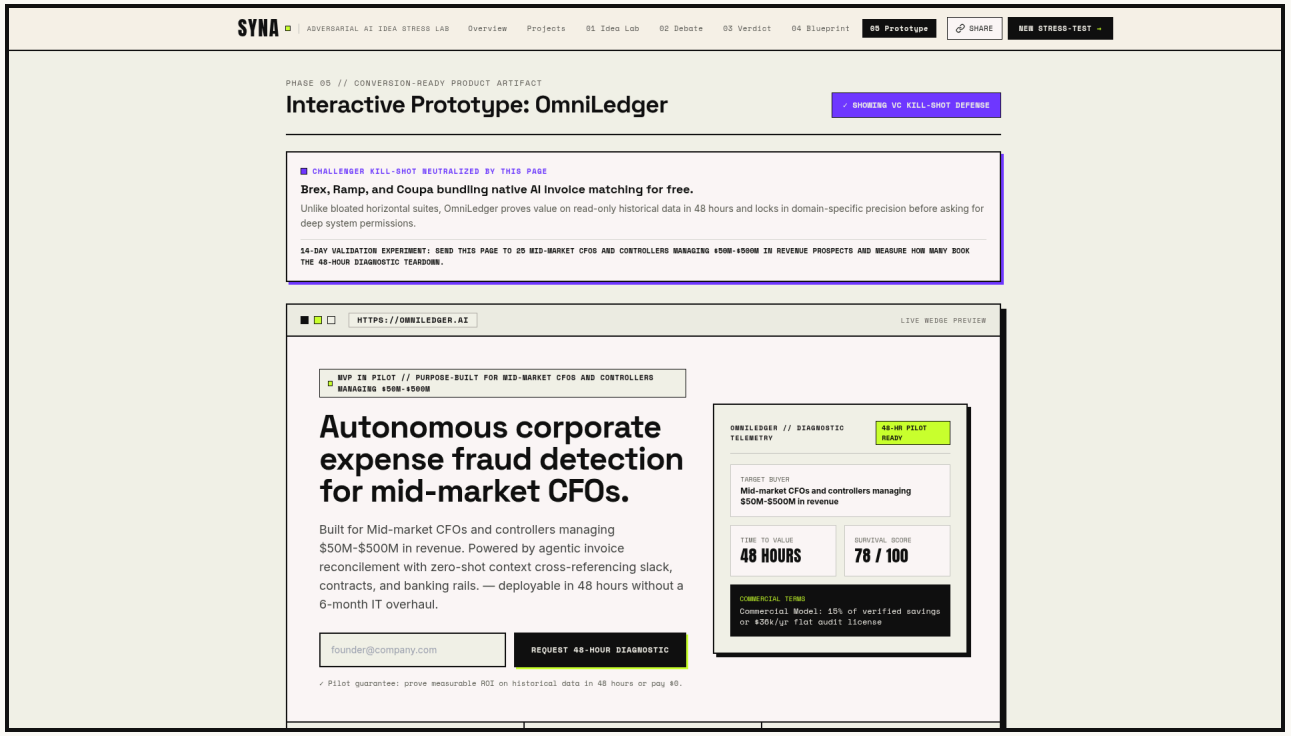

14-Day MVP Build Plan & 30/60/90-Day Gates

Translates the debate into an editable execution brief: ICP, 48-hour wedge, anti-fragility action neutralizing the VC's kill-shot, strict Day 30/60/90 validation gates, and a day-by-day 14-day build sprint (what to ship vs. what to refuse to build).

05 // INTERACTIVE SAAS PROTOTYPE

Auto-Synthesized For Target Buyer

BUILT-IN OBJECTION DEFENSE

Neutralizes the VC Kill-Shot Upfront

Every generated prototype embeds a dedicated defense banner explaining how the product overcomes the exact objection raised by the Ruthless VC during the debate.

DIAGNOSTIC TELEMETRY CARD

48-Hour Pilot Hook & Commercial Terms

Generates buyer-specific headline copy, a working pilot waitlist capture interaction, commercial pricing terms, and 3 FAQ answers tailored to the founder's thesis.

1-CLICK SHAREABLE DOSSIER LINKS

Clicking **Share** encodes the entire custom project dossier into a self-contained URL hash (`#page=verdict&share=...`) so co-founders and judges can open any live stress-test on any device.

Built for 100% reliability across Cloudflare Pages, Node, and Static Hosting

Zero build step required. Pre-wired Gemini API key + multi-model fallback cascade guarantees judges never hit a dead end or configuration modal.

LAYER 01 // FRONTEND `index.html`

Single-File React 18 Dossier SPA

5-Stage State Machine: Idea Lab → Debate → Verdict → Blueprint → Prototype.

Local + URL Persistence: Saves dossiers in `localStorage` and Base64 URL hashes.

Print / Markdown Engine: Native `@media print` PDF export & clean Markdown clipboard copy.

Stack: React 18 + Tailwind CSS + Neo-Brutalist UI

LAYER 02 // EDGE API `functions/api/*`

Cloudflare Pages Functions + Node Server

`POST /api/debate`: Orchestrates 4-round debate, audit, blueprint, and landing page synthesis.

`POST /api/intervene`: Injects founder rebuttal and recalculates survival score delta.

`GET /api/health`: Verifies Gemini key readiness and active model cascade.

Stack: Cloudflare Workers + Node.js HTTP Server

LAYER 03 // AI CORE `lib/syna-engine.js`

Cascading Gemini Model Router

Model Cascade: Automatically falls back across `gemini-3.1-flash-lite` → `gemini-3.8-flash` → `gemini-3.5-flash` → `gemini-flash-latest`.

Strict JSON Schema: Uses `responseMimeType: "application/json"` + fault-tolerant parser.

Deterministic Fallback: Idea-specific synthesis engine guarantees zero downtime even offline.

Stack: Google Gemini REST API + Deterministic Fallback

INPUT THESIS SUBMITTED TO CHAMBER

OmniLedger — Autonomous corporate expense fraud detection for mid-market CFOs

CHAMBER RULING

Survivable with Moat Pivot

78 /100

GROWTH HACKER WEDGE

90-Second Read-Only Plaid Audit

"Don't ask CFOs for a 6-month ERP overhaul. Hook read-only into 90 days of historical logs and surface $34,000 in duplicate SaaS seats and shadow billing in round one. Charge 15% of verified savings."

TIME TO VALUE:
Under 90 seconds (Zero IT permissions)

RUTHLESS VC KILL-SHOT

Incumbent Bundling & Wire Liability

"Brex, Ramp, and Coupa already own the card rail and are bundling native AI receipt matching for free. Worse: the first time your AI halts a legitimate payroll wire, the CFO fires you immediately."

DEFENSIBILITY SCORE:
48 / 100 (High Commodity Trap Risk)

SYNA 14-DAY PIVOT PLAN

Multi-Silo Semantic Graph

Refuse to touch raw payment rails in Year 1. Build the moat where card issuers are blind: cross-referencing signed Ironclad MSAs and Slack thread approvals against ERP invoices.

DAY 30 KILL/DOUBLE-DOWN GATE:
8 read-only pilots • $50k verified leakage

Not another chatbot wrapper—an end-to-end adversarial venture foundry

CAPABILITY / DIMENSION	GENERIC LLM CHATBOTS	STATIC PITCH GENERATORS	SYNA STRESS CHAMBER
ANALYTICAL POSTURE	Sycophantic ("Yes-Man" praise)	Cosmetic formatting only	**4-Round Adversarial Clash (Build vs. Break)**
INCUMBENT & MOAT AUDIT	Generic SWOT bullet points	None	**Names specific incumbents, CAC traps & liability**
FOUNDER PUSHBACK LOOP	Unstructured chat thread	Static one-shot generation	**Live Mid-Debate Intervention + Score Delta**
EXECUTION PLAN OUTPUT	Vague 6-month roadmap	Slide templates	**Day-by-Day 14-Day MVP Sprint + 30/60/90 Gates**
CUSTOMER VALIDATION ARTIFACT	None	None	**Interactive SaaS Landing Page + Objection Defense**

01 // FOR SOLO FOUNDERS
Kill weak assumptions in 60 seconds before spending 6 months building a feature incumbents bundle for free.

02 // FOR ACCELERATORS & HACKATHONS
Standardize cohort stress-testing with shareable dossier URLs, survival scores, and falsifiable 14-day pilot experiments.

03 // FOR VENTURE STUDIOS
Rapidly compare dozens of vertical AI theses across Demand Urgency, Defensibility, and GTM Velocity.

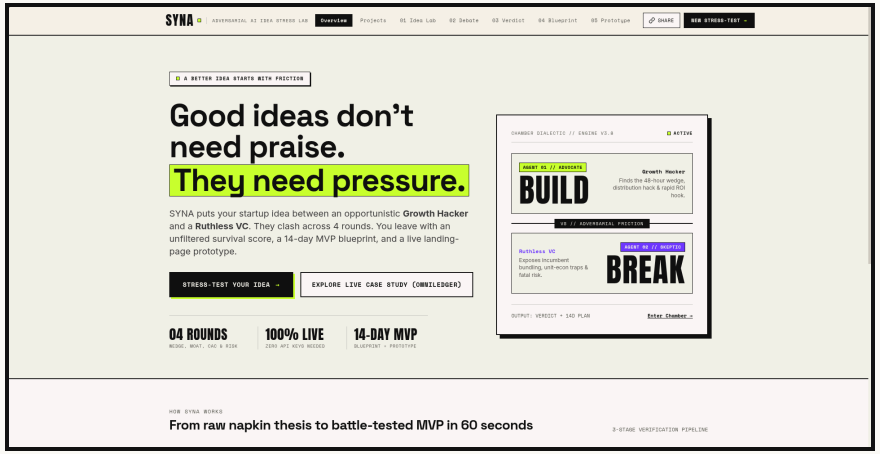

TRY SYNA RIGHT NOW — NO API KEYS NEEDED

Enter the chamber. Stress-test your idea in 60 seconds.

Click a 1-click preset in the Idea Lab or type any startup thesis. Watch the Growth Hacker and Ruthless VC clash across 4 rounds, inject a live founder rebuttal, and export your 14-day blueprint and interactive prototype.
